PRODUCT DATA SHEET

LOAD BRACKET

PRODUCT DESCRIPTION

Especially when using lightweight terrace decking like WPC boards, bending and warping can occur due to waterlogging or heat build-up. With the help of our load bracket, additional loads in the form of e.g. heavy stone slabs can be added within the substructure to counteract potential warping.

NOTE

Always include at least 4 brackets per stone!

ADVANTAGES

- · Prevents potential deformation or warping of the terrace
- Helps to secure the terrace's position
- Compatible with our EVO system profile and our HKP support system

MATERIAL

Aluminium

IMAGES OF APPLICATIONS

The required number of load brackets varies with the size of the selected stone slab.

LOAD BRACKET

PRODUCT DATA SHEET

The inserted stone disappears completely between the aluminium substructure and is no longer

ASSEMBLY NOTE

We advise using our 954068 BiGHTY drilling screw to fix the brackets to the profiles.

PRODUCT TABLE

visible when the terrace is finished.
