

Product data sheet – DrainTec Adapter

Product description

The DrainTec Adapter is a special accessory for the DrainTec Base. This permits another stone slab to be laid on the base instead of our DrainTec drainage grid. The adapter is inserted on top of the DrainTec Base and then sits firmly on the profile. The adapter can receive one stone slab or alternatively two stone slabs butted together, with the centre spacers of the adapter providing an even pattern of joints. The width of the stone slab needs to be 114 ± 0.5 mm in order to create a joint on the sides through which water can run off and be drained away in a controlled manner using the DrainTec Base.

Material

- Polypropylene copolymer (PP-C)

Advantages/Specifications

- Two attachment points enable the adapter to be fixed to the DrainTec Base.
- If DrainTec Base is attached to one of our PRO S-XL adjustable feet, the inserted stone slab can be adjusted to the level of the stone slabs of the terrace.
