

Product data sheet – DrainTec Base

Product description

The **DrainTec Base** is the ideal addition to our DrainTec Drainage Grate.

Thanks to the DrainTec Base, our DrainTec Drainage Grate can now also be used at ground level on gravel, sand and other substrates. Through the angular perforations in the middle of the base, the base can be combined with our adjustable support feet from the Pro-Line series. The Click Adapter 60 is required for this. By using an additional screw, the base can be fixed onto the adjustable support foot. The base can be used as part of standalone support and with aluminium substructures.

Advantages

- Supports drainage of decking
- Easy to clean base
- Does not require any additional substructure when laying on bulk material
- Compatible with classic substructures made of wood as well as with our modern aluminium system profile and the deck support system HKP
- Easy to lay
- Weather-resistant
- Compatible with adjustable feet Pro S – Pro XL

Instructions for use

When using on an aluminium substructure we strongly recommend the use of our MaTre Tape (product no. 945319). This serves to prevent noise when treading on the structure.
