

PRODUCT DATA SHEET

DRYWALL SCREW

PRODUCT DESCRIPTION

Eurotec's black phosphated drywall screws are used for the mechanical fixing of plasterboards in drywall construction. Thanks to the phosphating process, these screws offer excellent corrosion protection.

The screws in this range differ in terms of their thread type and comply with the DIN 18182 standard for building materials.

ADVANTAGES

- Quick and easy screwing-in
- Phosphated for corrosion protection during short-term exposure to moisture
- For use and processing in drywall and acoustic construction

FIELD OF APPLICATION

- The screws are suitable for the quick fastening of plasterboards.

NORM

- Thread and thread type for building materials standardised by the DIN 18182 standard

Drywall screw with fine thread

Drywall screw with coarse thread

Drywall screw with drill tip

Drywall screw with Hi-Lo thread

Magazined
