

PRODUCT DATA SHEET

TERRASSOTEC 5,5 TRILOBULAR

PRODUCT DESCRIPTION

The Terrassotec 5.5 Trilobular made of hardened stainless steel / A2 stainless steel / A4 stainless steel is a screw that has been **specifically** developed for **fastening decking boards** to wooden substructures. The screw has an **extra reinforced shank**, an additional **underhead thread** and a step head with **TX drive**.

MATERIAL

Hardened stainless steel:

- Stainless steel according to DIN EN 10088
- Acid-resistant under certain circumstances
- 10 years of experience without any corrosion problems when used with suitable woods
- 50% higher breaking torque than A2 and A4
- Magnetisable
- Can be used in service classes 1, 2 and 3
- Not suitable for woods containing high levels of tannin, such as cumarú, oak, merbau, robinia, etc.
- Not suitable for salty atmospheres
- Not suitable for chlorinated atmospheres

A2 stainless steel:

- Suitable for salty atmospheres under certain circumstances
- Acid-resistant under certain circumstances
- Not suitable for chlorinated atmospheres
- Can be used in service classes 1, 2 and 3
- Not suitable for woods containing high levels of tannin, such as cumarú, oak, merbau, robinia, etc.

A4 stainless steel:

- Suitable for woods containing high levels of tannin, such as cumarú, oak, merbau, robinia, etc.
- Suitable for salty atmospheres
- Acid-resistant under certain circumstances
- Can be used in service classes 1, 2 and 3
- Not suitable for chlorinated atmospheres

APPLICATION IMAGE

Use of the Terrassotec Trilobular on oak wood.

PRODUCT DATA SHEET

TERRASOTEC 5,5 TRILOBULAR

ADVANTAGES

- Reduction of chip build-up due to special head
- The special screw geometry reduces the risk of splitting the wood
- ⇒ However, pre-drilling is absolutely recommended, especially for hardwoods or in deck and facade construction!
- Underhead thread provides additional support for the decking boards
- Screws do not hit one another when screwed in using the TX drive

i INSTRUCTIONS FOR USE

When building a deck from high-quality wood, pre-drilling and pre-sinking of the decking boards is highly recommended. This applies to both softwood and hardwood. We recommend our Drill Stop for this purpose.

PRODUCT TABLE

Terrasotec 5,5 Trilobular					
Art. no.	Dimensions Ød x L [mm]	Thread length lg [mm]	Head diameter Ødh [mm]	Drive	PU
