

## Product data sheet – MaTre Band

### Product description

The MaTre band is used for material separation and thus prevents creaking between the aluminium profiles and planks.

Suitable for  
EVO, EVO  
Light and  
HKP

### Material

- Butyl rubber black, one side with butyl rubber adhesive with high adhesion force of 100 N/25 mm

### Properties

- Easy mounting due to adhesive film
- Optimum fitting due to very thin material
- Tear-resistant and durable
- Screws can easily be screwed all the way through
- Can be cut lengthwise individually

### Product table

MaTre Band		
Art. no.	Dimension (H x L x W)	PU
945319	0,5 x 20000 x 10 mm	5

## Product data sheet – MaTre Band

### Instructions of use

- Processing at +5 °C to 40 °C
- Surfaces to be bonded must be free of grease, oil, surfactants, dirt and dust.
- Not resistant to oils and organic solvents (e.g. petrol)
