Product data sheet – Wall support

Product description

Thanks to their high load-bearing capacity, the Eurotec **wall supports** can support walls until they are fully assembled without any problems and therefore take the place of many helping hands. A locking pin system enables especially quick and easy adjustment of the wall support's height. Subsequent fine adjustment is also possible using threaded rods.

Advantages

- Suitable for universal use
- Easy to handle
- Quick to assemble
- Almost no force needed from the user
- Very secure and sturdy
- Saves time
