PRODUCT DATA SHEET

T-BEAM ANCHOR

PRODUCT DESCRIPTION

The T-beam anchor is a fastener that was **specifically designed** for connecting wood beams to steel beams.

The T-beam anchors should always be attached in pairs and diagonally across each other to be able to uniformly absorb the forces occurring. The three large holes also enable installation on concrete parts. For mounting on wood, we recommend our angle fitting screw. Our Bighty PH is recommended for mounting on aluminium.

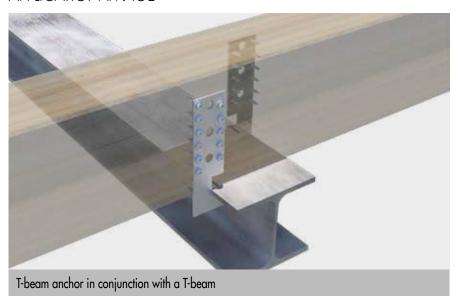

ADVANTAGES

- · Specifically designed for fastening to T-beams
- · Quick and easy assembly

INSTRUCTIONS FOR USF

It is possible to use this in conjunction with our aluminium HKP support profile. For this purpose, please contact our technical department (technik@eurotec.team) to see if your project is feasible.
