

PRODUCT DATA SHEET

EVECO ALUMINIUM SYSTEM PROFILE

PRODUCT DESCRIPTION

The Aluminum Profile System Eveco is an aluminum substructure for terraces which were developed specifically for the use of fastening clips. This profile is suitable for terrace coverings with grooved sides.

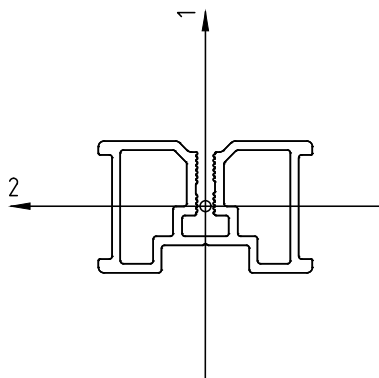

SPECIFICATIONS

- Developed specially for PRO adjustable feet with Click adapter
- In case of low structure height, the profile can be used without pedestals
- Position retention thanks to Click system without screws
- Load-bearing, torsion-free, form-stable and straight
- Screw channels avoid lengthy drilling times

MATERIAL

- Aluminium
