

PRODUCT DATA SHEET

LONG BITS SET

PRODUCT DESCRIPTION

The long bits set consists of 10 x 50 mm long bits as well as a magnetic screw holder in a practical storage box. The long bit in conjunction with the magnetic screw holder enables a strong hold on the screw head and prevents the screw from knocking while it is being screwed in.

Thanks to the practical plastic clip, the storage box can be attached to a piece of clothing, ensuring it does not interfere with the assembly work.

MATERIAL

- Corrosion-resistant S2 steel, galvanised as per DIN 3126
