

Product data sheet – Downpipe hose

Product description

The Eurotec downpipe hose is used as a downpipe replacement for rainwater drainage. With this system, the façade is protected from soiling and it is the best cost-effective transitional solution until the final assembly of the downpipes.

Material

- PE polyethylene

Advantages

- Discharges rainwater in a controlled and safe manner
- Quick and easy attachment and removal
- Optimal interim solution for imminent construction work
- No soiling and damage to the façade
