

43-3 Handy, 2-arm small parts puller with power-transmitting and self-centring puller legs

DESCRIPTION

The handy 2-jaw small parts puller with power-transmitting and self-centring jaws is used for the sensitive pulling of small bearings, gears and discs for narrow, hard-to-reach spaces. The compact and space-saving design of the puller with narrow legs that widen towards the claw is particularly suitable for electric motors. The free-moving pin on the T-handle guarantees comfortable, one-handed tightening of the Spindle in the tightest of spaces.

RANGE OF APPLICATION

For sensitive extraction of small bearings, gear wheels and discs for narrow, poorly accessible gaps

BENEFIT

- Self-centring of the legs by manually tightening the Spindle (Autogrip Technology)
- Integrated, free-moving pin on the T-handle guarantees manual spindle drive in the tightest of spaces
- Slim design of the legs makes it possible to reach places that are difficult to access
- No further tools are required for the pulling process

OPERATION

- Place the jaws on the part to be pulled from the outside
- Swivel the claws under the component
- Pull the Spindle manually under pressure to fix it in place
- Move the T-handle on the spindle head until the component is released

MASTER DATA

GTIN [EAN]	4021176015946
Country of origin	DE
Case material	Tool steel
Series	43
Gross weight [kg]	0,265 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes

SPARE PARTS

- 43-1-T_Traverse
- 43-3-80-P_2 Pulling jaws (pair)
- 43-3-206_Druckspindel
